The Fastest, Safest Way To Dry Your Pet!

The new portable **Air Force® QuickDraw™** is the latest addition to Metro's proven line of professional all-steel, American-made, forced-air pet dryers. It features an exceptionally efficient 1.3 HP motor that produces 18,000 ft./min. of warm (25-30 degrees above ambient) clean, filtered air. That's enough to thoroughly and safely dry a large, long hair dog in minutes, yet it stands only 9.5" high and weighs just a hair over 3 lbs. **Pound-for-pound the most powerful dryer money can buy!™**

The **QuickDraw™** is designed for easy home use as well as hard, day-in-day-out professional applications in the shop, at shows, or on the road:

- **Best power-to-weight ratio of any dryer on the market.**
- **Cuts drying time by up to 70%.**
- **Produces 18,000 ft./min. of warm, dry, clean filtered air.**
- **Easy to use-lets you groom like a pro at home.**
- **Compact, lightweight and easy to handle.**
- **Safer and more effective than human hairdryers.**
- **Promotes healthy coat and skin.**
- **Rugged all-steel construction, built to last.**
- **One-year warranty.**

Patents Pending
