

Operating Instructions For Blower/Dryer Mini K-9

1. Connect hose to unit making sure to tighten with clamp (A) supplied.
2. Unit is supplied with a blowertip and connector. Install connector (C) into hose and secure using 24T clamp (A)
3. Make sure gray filter (B) is installed on machine. The filter snaps over intake caps on end of machine. Filter must always be kept clean and in place on machine while in use. **Failure to use a proper and maintained filter will void warranty.**
4. Connect service cord male plug to 115 volt outlet. Be sure to use fuse with at least 15 amp rating.
5. Make sure to hold hose firmly while turning on unit. To begin use turn switch to low for light jobs or high for maximum blow-power.
6. The manufacturer also recommends wearing safety glasses while using unit.
7. Be sure to keep filter clean and intake clear from debris to insure full power and long motor life.
